A gentle reminder

This app provides informational skin-health support, not a diagnosis. Seek urgent care for severe or rapidly spreading symptoms.

Home | Analyze | Reports | Care

DerMedics AI

H

Let's look closer

Upload a clear photo of the affected skin.

Add a skin photo

Use good lighting and avoid filters. Choose a photo from your gallery.

Choose photo

JPG, PNG or WEBP • Up to 10 MB

AI skin analysis

The model analyzes the uploaded image and returns a likely condition.

- (•) Analyze uploaded photo
- ( ) Inconclusive

A few details

Body area: Face / neck

What have you noticed? Redness, texture or irritation...

[ ] I understand this is informational, not a medical diagnosis.

Analyze skin image

Seek medical care for severe or rapidly spreading symptoms.

AI ANALYSIS

Acne — Illustrative match • 82

Example output only. This is not a real model prediction or a diagnosis.

AI model confidence score

About the detected condition

AI-generated description and relevant care information

About acne

Acne can involve clogged pores and inflammation. Possible triggers include hormones, skin products or medicines.

Symptoms & precautions

Spots or redness may occur. Avoid picking; seek care if symptoms are painful or persistent.

AI medicine suggestions

Generated using the detected condition, its description and your region. Review with a clinician.

Review AI medicine suggestions

For informational guidance only — not a medical diagnosis.

We couldn't find a reliable match

An image may be unclear, or a condition may not be supported.

No reliable prediction

We won't show disease-specific medicine information for an uncertain result.

NO MEDICINE SUGGESTIONS

What to do next

Prioritize your wellbeing

Try a clearer photo

Use even lighting, focus on the affected area, and avoid filters.

Speak with a dermatologist

A clinician can examine your skin and ask about symptoms and history.

Find a dermatologist

For information only. Seek urgent care for severe symptoms.

AI medicine suggestions

Condition-specific information based on your analysis and region.

Based on your AI analysis

Suggestions use the detected condition and generated description, with regional context. Live results should use validated medical sources.

REGION: PAKISTAN • VERIFY LOCAL AVAILABILITY

Suggestions for the detected condition

Example: Benzoyl peroxide

Illustrative acne reference only. Actual suggestions must match the detected condition and verified local guidance.

EXAMPLE • NOT VERIFIED

Example: Topical retinoids

Some options may be prescription-only and have important precautions. Suitability depends on the person.

EXAMPLE • NOT VERIFIED

Example: Topical antibiotics

Use only when clinically indicated and with professional guidance. Recommendations must follow trusted sources.

EXAMPLE • NOT VERIFIED

Safety first — no prescriptions

Confirm suitability, side effects and local availability with a pharmacist or dermatologist.
